I imagine the following draft to supercede, or complement, the existing SJC Vision Statement; basically the two vision statements could be interwoven by a few teams of editors and presented as a community based restating for adoption by the CC. If this is done soon, and there was pressure on the CC to adopt, then this would help DCD going forward.

1. If we don't do this, it won't be done. The county's not going to do this.
2. Assuming we accomplish this, the provisions of metrics and enforcement that I described in my previous email to most of you this morning regarding my support for the EPRC vision statement and pillars would need to be included, approved and enforced. Otherwise we are wasting our time.

I don't think there would be much pushback from the community regarding this updating of the SJC Vision Statement in light of the changes that have occurred in the last 23 years. A far better way of saying this is that I think this updated VS would resonate well with the majority of visitors, residents and property owners.

Joe
