subject: Signed Comp Plan Petition

petition: We the undersigned request the county to adjust the current comprehensive plan update schedule. Please redesign the update schedule to allow sufficient time for substantive citizen input to ensure topics such as vision, density, carrying capacity, sustainability, resilience and compliance with GMA are thoroughly discussed and appropriate solutions explored, not just for the 20 year planning period but up to ultimate buildout. We ask this because the current comprehensive plan ignores our county's vision statement and leads to a resident and visitor population that far exceeds our resources. Our current course threatens our way of life, rural character, and our community.

comments: The concern is not just future building and population density but also how future infrastructure is going to be managed.

I wish to see the following considered:

- Options for electric/alternative vehicle use.
- Orcas/all islands in the county obtain Dark Sky status.
- All villages in San Juan to work on reducing their 'light pollution' at night.
- Water districts to minimize chlorine/chemical use, and to explore alternatives (i.e. UV-light or reverse osmosis, etc.) for water treatment.
- Sewer water treatment alternatives as well should be considered.
- Any and all building practices to adhere to green-building/LEED protocol.

Basically, any and all human impacts to be minimized to the best ability/technique possible ...
For All Time, Forever Wild.
