S.J.C. DEPARTMENT OF

JUL 11 2017

COMMUNITY DEVELOPMENT

Actually I was concerned on a level well above the fire marshal' IE the incompatibility of the High hazard use in accordance with the International building code adjacent single and multi-family residential this is beyond the fire marshal call. Also the appropriateness' of a street a public one, "Seaview" and a private one "Airoview" developed not to handle the vehicular traffic subjected to by this proposed use or any other large industrial use for that matter. Not a Fire Marshal level of question. These questions also fall well beyond, in addition to fire marshal Purview. Access, and roadway conditions are more than fire marshal questions. Also, and most critical in my opinion while there are many times a conditional use falling outside of the criteria for use as acceptable or yes by the tables. The conditional use provisional questions here seem to have been simply pushed down the road with no consideration for suitability or normal code compliance

Evelyn,  
That is a condition of approval. If the permit is granted, he needs to produce these plans and have them approved by the fire marshal.

Hi Julie, do you have a copy of the safety analysis and fire and evacuation protection plan that must have been prepared prior to the establishment of findings?  
I want to review those because there doesn't seem to be anything in your document.  
Thanks Evelyn

I thought you were on the list I developed this morning and sent the report to. Anyway, here it is.
