Subject: RE: Runstad Biological assessment and geotechnical supplement timeline received

Thanks Erika – That is correct (all field work is upland of the OHWM).

Best regards, Joe

Hi Joe,

Just confirming that we received your timelines for additional geotechnical work (driller, excavator and auger drill for soils investigation on January 10, 2017) and submittal of the following additional information:

- Biological assessment of partial bulkhead removal – by January 31, 2017
- Supplemental Geotechnical information – by January 31, 2017

We assume that the excavator work is landward of the OHWM. We will send the supplemental geotechnical information for third party review when we receive it. Thank you for the update. Happy Holidays!
