Subject: Fwd: Save our food trucks

I received this e-mail about banning food trucks.

Governments don't usually ban a business unless there is a valid reason to suspect that type of business is not in the public good. What is driving the county toward banning food trucks? What else would be banned along with food trucks?

I have no problem with the idea IF there is a valid reason BUT if the reason is a commercially driven attempt by a few to profit by limiting free enterprise competitors, then I strongly object.

Please explain the reasoning that's driving the proposed legislation!
My e-mail is listed below. **I await your reply!**

-- Hey!!!

We need different food on the island...these are local run trucks. They want to make it so Lopez can not have food trucks.

They are asking for concerned citizens to send their comments to the Lopez Village Planning committee a <mailto:LVSPComments@sanjuanico.com> and reference Page 42 which pertains to food trucks. People need to say why we need food trucks, why we want them, what they provide, why they are good, etc. The committee needs to see that the public is not okay with this.

The next meeting is this Friday in San Juan. please attend

We can change this.....please write to them.

Thank-you,

Sally
