Subject: SJCo Marine shorelines

San Juan County beaches and nearshore support forage fish that feed Chinook salmon, and Chinook salmon feed Southern Resident Killer Whales. I would ask the San Juan County Council and Planning Commission to make the following changes needed to protect shorelines:

1. Require mitigations to occur within the same watershed as the impact on all County islands where development could occur;
2. Thoroughly comply with the required changes to the criteria for new or expanded soft shoreline armoring and the definition of soft shoreline armoring;and
3. Require an annual evaluation of shoreline developments' cumulative impacts on shoreline conditions, and a process to make corrections as needed, to ensure No Net Loss of the ecological functions that support forage fish, Chinook salmon, and Southern Resident Killer Whales.

Thank you, Jim Lombard Lopez Island 98261
