**Subject:** Comment on Shoreline Master Plan revisions

Dear Council Members,

As a resident of San Juan Island, I am very concerned about the future ecological health of the Salish Sea and all its inhabitants, particularly now the Southern Resident Orca whales which I fear will go extinct if we don't take stronger measures to ensure healthy shorelines for forage fish which

feed Chinook salmon, which in turn feed the Orcas. The scope should be broadened for the restoration and preservation of all areas that have eel grass which forage fish need for their habitat.

Please strengthen the shoreline regulations taking into full consideration the ecological health of our area. We cannot continue 'business as usual'. I support the comments that the Friends of San Juans have made in regards to the amendments to the Shoreline Master Plan.

Thank you,  
Carol Kibble
