Dear Planning Department,

Please include a Truth in Planning statement in the Comprehensive Plan. People need to know the truth. The islands have limited resources and house unique and fragile natural ecosystems. The effects of climate change may be worsened by population growth. I am especially concerned about water. From what I understand, underground fresh water supplies are limited. We must be very careful to keep the population at a level that our water supplies can sustain. Another concern, of course, is the ferry system which can barely handle the population we have now. It seems like building permits must be restricted to control population growth.

Thank you for your attention,
Cindi Lund, Lopez Island
