Dear Sir,

In reviewing the maps for the SMP, we discovered that our property is marked with a red dot indicating "armoring". In talking with you this term meant we had a "bulk head". Prior to reviewing the SMP, we had received a letter from the "Friends of the San Juan" stating that we had a bulkhead in need of repair. The letter instructed us to call if this was in error or we needed explanation. I did that and spoke to a "Rita" in that office. I told her we had never had a bulkhead and anything on the beach had come in with the tides. Some of this debris has been on the beach for over 100 years. This property has been in the family since 1897. She told me she would correct the information. In the SMP it states some information for this report was obtained from the "Friends". Evidently the information was not corrected and the SMP still has incorrect information.

When I spoke to you I was advised to send the pictures we have of the beach showing debris and it is not a bulkhead. These pictures were taken over the last 50 or 60 years and I would appreciate it if you would return the older pictures.

Please call us if you need more information. Our telephone number is 360-468-2668. We expect a written response within two weeks as deadlines are coming up that this information has been corrected. Thank you for your help.

Sincerely,

Robert and Vivian Burt
