RE: Shoreline properties on Orcas Island – 26211009000 and 262111007000

Dear Colin,

I have been away all winter and on returning understand from Richard Fralic that the County has had an outside firm describe all the shoreline properties. Yesterday I went to the Orcas Library to look at your material, which was difficult to understand although I did find my properties on the disc, but not your description. Today I spoke to your assistant and she recommended I write you a letter. I will give you a description of both properties below. But, I would like you to contact me by phone (376-5294) or email (sjorcas@gmail.com) to see if your and my descriptions of my properties agree.

26211009000 – 61 Harney Lane - Waterfront facing south and west. There is a small house, carport/bunkhouse and bathhouse on one portion of the property. Planting around the house is natural with a grassy portion that was previously a drain field. The south portion is forest with a rocky high bank. The west portion is partially high bank with the remainder being a sandy beach with a moderate bank. Behind all of this is a forest. Off the west high bank there are natural steps with a railing going down to a dock. There is a path going through the woods behind the beach, going to the beach and the adjoining Observatory Lane property.

262111007000 – Observatory Lane – Waterfront facing west. This property adjoins the Harney Lane property and there is a continuation of the path mentioned above that goes through the forest. It is an open high bank with a relatively large house and some grass to the NW. I think this was previously a drain field. There is a driveway directly behind the house going to the next house to the north. There is a two car garage on the other side of the driveway surrounded by forest.

I am looking forward to your response to my request for assistance as mentioned in paragraph 1. Thank you.
