*NOTE: The vegetation percentage listed in Reach 180 is high and not reflective of what is on the ground for this 26 acres. Map 19B is an example of the maps in this report not showing what is on the ground. Some are hard to read, others confusing and some just not accurate. To say the glossary included in The Shoreline Characterization and Inventory Report is inadequate, is putting it mildly.

This photo of a portion of lots #1 and #2 shows a preexisting condition prior to the purchase in 2006. At one time the Fowler Farm was the largest supplier of eggs to Seattle. Upper middle in the photos shows the remains of a chicken coop that was removed by the current owners. To the right the structure running parallel to the shoreline was a utility barn that was in good shape but its removal was required for short plat approval. Noted above the building in question was the remains of various trucks, cars and farm equipment. Portions of the property was littered with discarded and worn out equipment.

Lot #1 common area at the dock. This is the transition area where the fixed pier will join the shoreline.

Lot #1 common area gravel path– Farmhouse on lot #2 in background.

Lot #1 Blind Bay Estates– View to northeast– boat house with dock in the background.
